

A career in the oil and gas industry

Commercial Adviser

The purpose of this role is to add value to assets through negotiating and delivering robust commercial arrangements.

Your responsibilities and key objectives will be:

- Developing the business plan and strategy
- Recommending commercial solutions and providing support
- Negotiating with and influencing third parties
- Providing commercial input to new venture opportunities
- Preparing indicative tariff requests for assets

You should have a technical or business degree.

You will need:

- A proven track record in successful negotiations
- The ability to suggest innovative solutions to problems
- Experience in participating in multi-disciplinary teams
- Experience in managing complex gas contracts and joint venture agreements
- Experience of liaising with government and industry organisations
- Strategic planning experience
