

A career in the oil and gas industry

Environmental Adviser

The purpose of this role is to assist with the development, implementation and monitoring of environmental strategies, policies and procedures.

Your responsibility and key objectives will be:

- Advising on environmental policy, standards, site procedures and/or guidelines
- Facilitating external and internal audit processes
- Assisting with the implementation of company environmental management systems
- Collating best practice and inputting into CSR reporting process
- Assisting with the development and implementation of Environmental Standards
- Ensuring that appropriate emergency response plans and training requirements are in place
- Delivering Environmental and Social Impact Assessments

You should have a degree in environmental science or related field

You will need:

- At least five years of field environmental related experience
- Knowledge of International Codes of Practice, waste management practices/disposals and environmental legislation
- Experience of implementation and operation of ISO 14001 Environmental Management Systems
- Understanding of Oil Spill Contingency Systems
- Clear understanding of key areas of environmental management, including biodiversity, climate change and resource management and practical management solutions.
