

A career in the oil and gas industry

Health & Safety Manager

The purpose of this role is to develop and implement health and safety management policies, guidelines and strategy across all facets of the business.

Your responsibility and key objectives will be:

- Responsible for instituting health and safety management frameworks and guiding protocols such as permit to work, journey management plans, environmental impact assessment protocols etc.
- Leading, motivating and managing the team to plan, execute, monitor and evaluate a fit for purpose strategy
- Managing relationships with external stakeholders
- Delivering nationalisation and succession plans in the health and safety department by coaching, and mentoring and being responsible for staff training and development

You should hold a degree or equivalent in an engineering or earth science discipline, together with a formal safety qualification.

You will need:

- Significant E&P health and safety experience is essential
- Recent experience with an Operator is preferred
- Line operations and experience within a major project team desirable
